SUMMARY

Computer Science postgraduate with a strong foundation in Machine Learning, Deep Learning, and Python. Skilled in data preprocessing, model development, and analytical problem-solving through academic projects and coursework. Passionate about applying AI and data-driven techniques to solve real-world challenges. Seeking an entry-level role where I can contribute technical expertise while continuing to grow as an AI/ML professional.

EXPERIENCE

Gradtwin, Machine Learning Intern

03/2026 – 06/2026

Completed an internship at Gradtwin in the Machine Learning domain, where I gained practical exposure to data preprocessing, model development, and performance evaluation. The internship strengthened my understanding of machine learning workflows and improved my analytical, problem-solving, and technical skills through hands-on project experience.

Xenforte Technologies Pvt Ltd, Full Stack Developer

07/2025 – 10/2025

During my internship, I contributed to the development of an invoice management application by implementing core features such as invoice creation, data validation, and automated calculations. I worked on building and optimizing the backend logic, improving data processing accuracy, and ensuring smooth integration between the frontend and backend components. I also assisted in debugging application modules to enhance overall system performance and reliability.

NASO Technologies Pvt. Ltd., Machine Learning Intern

05/2025 – 06/2025

During my internship at KAVIGAI, I developed a Flask-based music recommendation system that generates top-five similar song suggestions using audio feature similarity. I implemented feature extraction using key audio attributes such as energy, loudness, valence, tempo, speechiness, danceability, acousticness, and instrumentalness, and built a testing script to validate the similarity logic. I contributed to preprocessing, similarity computation, testing, and deployment of the application.

PROJECTS

TANCET College Predictor [↗](#)

12/2025

A project focused on predicting suitable colleges for TANCET candidates using machine-learning techniques

- Built a model that recommends the top 5 colleges based on rank, community, and four years of cutoff data.
- Performed data cleaning, feature engineering, and model training for accurate predictions.
- Implemented a hybrid machine learning and rule-based approach to improve recommendation reliability.

Pneumonia Detection System [↗](#)

11/2025

A project focused on detecting pneumonia from chest X-ray images using deep learning techniques.

- Built a **deep learning-based medical image classification system** to detect Pneumonia from chest X-ray images.
- Trained and evaluated a CNN model using **ResNet50 architecture** for binary classification (NORMAL vs PNEUMONIA).
- Developed a **FastAPI-powered backend** for real-time model inference and REST API integration.
- Created a simple **web interface using HTML/CSS and Jinja2** for image upload and prediction visualization.
- Deployed the application on **AWS EC2**, enabling accessible cloud-based predictions.

TruthLens AI – Evidence-Based Fake News Verification System [↗](#)

06/2026

- Built a fake news verification system using **TF-IDF + Logistic Regression** for historical claim classification.
- Implemented **NewsAPI retrieval, SBERT-based ranking, and DeBERTa NLI** to verify claims using external evidence.
- Designed an explainable pipeline that produces **Supported / Refuted / Insufficient Evidence** verdicts with confidence-based reasoning.

EDUCATION

Master of Computer Application , <i>University of Madras</i> Cumulative Grade Point Average: 8.0	09/2024 – 04/2026 Chennai
Bachelor of Science in Information Technology , <i>VHNSN College</i> Cumulative Grade Point Average: 8.4	06/2021 – 04/2024 Virudhunagar
Higher Secondary , <i>Kshatriya Vidyasala Higher Secondary School</i> Percentage: 88.3%	06/2019 – 04/2021 Virudhunagar

SKILLS

Core Concepts	Frameworks & Libraries	Tools & Platforms
- Neural Networks and Deep Learning - ML Algorithms - Data Structures	- TensorFlow, Keras - PyTorch - Scikit-Learn	- Jupyter Notebook - Linux - GitHub - PowerBI

KEY ACHIEVEMENTS

Paper Presentations	30/08/2023
Secured II Prize in a Paper Presentation Competition on "Artificial Intelligence " conducted by P.K.N. Arts and Science College, Madurai	
	09/02/2023
Secured II Prize in a Paper Presentation Competition on "Deep Learning " conducted by The American College, Madurai	
Club Leader	01/02/2026
Served as the Club Leader of the AI & ML Club, organizing learning sessions and guiding members on machine-learning concepts.	

CERTIFICATES

AWS AI Practitioner Challenge Completed the AWS AI Practitioner Challenge , focusing on AI fundamentals and AWS AI/ML services.	AWS Scholars Program Project Badge Analyze Data using AI with PartyRock – Applied AI tools to analyze data and generate actionable insights.	GenAI Powered Data Analytics AI-Powered Credit Risk Analysis , Predictive Modeling, and Responsible AI for Collections Strategy (2026)	Machine Learning – Udemy NumPy, SciPy, Matplotlib & Pandas for Machine Learning – Udemy – Developed skills in data analysis, visualization, and machine learning with Python.
Red Hat Certified System Administrator (RHCSA) Demonstrated proficiency in Linux system administration , user management, and system configuration	Value Added Course Completed the Value Added Course "Mathematics for Competitive Examinations " during the academic year 2023–2024 and secured 92%	Typewriting English Typewriting (First Class with Distinction) – Certified in professional English typing skills.
